

Energy Recovery

EVOAQ

Air Quality Innovation

Our Values

Improving Energy Efficiency using highly efficient products and superior system controls

Maintaining Indoor Air Quality through intelligent software designed specifically for NZ

On-Demand Ventilation by monitoring air quality and ventilating as required

Why Heat Recovery

A healthy home requires good ventilation to maintain high Indoor Air Quality.

With the benefits of heat recovery you can also recover the heat within the home you have already paid for.

Plus long-term exposure to VOC's within your home can damage your health.

ENERGY

EFFICIENCY

EVOAQ

Our System

Using the latest technology and most energy-efficient products, we have created the most intelligent heat recovery system to give you constant ventilation, while having minimal effect on the thermal comfort and noise levels in your home.

Specially designed for spaces with limited or no roof space.

Heat Recovery System	AQ-150-A
House Size	Up to 50m ²
Number of Rooms	1 Room
Voltage (V/Hz)	220/50
Power (W)	25
Air Flow (m ³ /hr)	150
Efficiency (%)	90
Noise (dB)	20-45
Control interface	IR remote
Weight (kg)	5.7
Specific Fan Power (SFP)	0.355 Watts per L/s

Dimensions

Filtration System

System Operation
